This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

INTEREST TABLE

ON THE

PRODUCT SYSTEM USED BY BANKERS.

To FIND THE INTEREST on a stated amount for any number of days—Multiply the item by the days; then find from the Table the interest on the *product*, which will be the interest required.

Example.—Required the interest on £108 for 45 days at 4 per cent.

Multiply the sum £108 by 45=4860.

See the product	4000	: the interest at	4	per cent. is	.	£0	8	9

MONEY, WEIGHTS, AND MEASURES.

In January, 1826, the Act of Uniformity, as regards Weights and Measures, became the law of the land. According to this Act, the Tables of Weights and Measures are classified under the distinct heads of *Length*, *Surface*, *Volume*, *Specific Gravity*, *Capacity*, *Space*, *Time*, and *Motion*.

STERLING MONEY.

2 Farthings	equal to	1 halfpenny.
4 Farthings	„	1 penny.
12 Pence	„	1 shilling.
20 Shillings = 240 pence = 960 farthings	„	1 pound.

TABLE OF TIME.

60 Seconds	equal to	1 minute.
60 Minutes	„	1 hour.
24 Hours	„	1 day.
7 Days	„	1 week.
52 Weeks 1 day, or 365 days	„	1 ordinary year.
365 Days, 5 hours, 48 min., 49 sec.	„	1 solar year.
365 Days, 6 hours	„	1 Julian year.
366 Days	„	1 leap-year.

The year is also divided into 12 Calendar Months; namely—

January	31 days.	July	31 days.
February, (29 or)	28 „	August	31 „
March	31 „	September	30 „
April	30 „	October	31 „
May	31 „	November	30 „
June	30 „	December	31 „

The number of days in each month may be easily remembered from the following well-known lines—

Thirty days hath September,
April, June, and November;
February has twenty-eight alone;
All the rest have thirty-one,
Excepting leap year,—that's the time
When February's days are twenty-nine.

As the true solar year is nearly 6 hours more than 365 days, every fourth year, termed leap-year, is reckoned as consisting of 366 days, in order to make allowance for the excess; the additional day being given to February.

To ascertain if any year is leap year, divide it by 4, and if there is no remainder, it is leap year; if there be a remainder, the number over indicates how many years it is after leap-year.

FRENCH TABLES.

THE new Metrical system established in France has for its basis the *mètre*. It is called *metrical*, because its principal units are derived from the *mètre*. The *mètre* is the ten-millionth part of the distance from the Equator to either Pole, as ascertained by actual measurement of an arc of the meridian.

The units are as follow:—

The *Mètre*,	for measures of	Length.
The *Are*,	„	Surfaces.
The *Stère*,	„	Solids,
The *Litre*,	„	Capacity.
The *Gramme*,	„	Weight.
The *Franc*,	„	Money.

The *Mètre* is the ten-millionth part of the Quadrant of the Meridian, as stated above, and is equal to 39·371 inches.

The *Are* is a square containing one hundred square *mètres*.

The *Stère* is a cubic *metre*.

The *Litre* is equal in volume to the tenth part of a cubic *mètre* of distilled water.

The *Gramme* is equal to the weight of the hundredth part of a cubic *mètre* of distilled water,

The *Franc* weighs five *grammes*.

In order to express the decimal proportion, the following prefixes to the principal units have been adopted, viz.:—

Déca	signifies	10	times the unit.
Hecto	„	100	„
Kilo	„	1000	„
Myria	„	10,000	„
Déci	expresses the	10th	part of the unit.
Centi	„	100th	„
Mili	„	1000th	„

The following Tables give the British value of the different French denominations.
